MORE FROM QUESTIONSANSWERED.NET Free Online OCR ScannerOrganizations often receive crucial information and data in document image form. These images can be a photo of a document, a scanned document, a photo-picture or subtitle superimposed in an image. The real challenge for the team of operations is to be able to extract information and data from these photos. It may take hours to manually extract these data and assemble them in a structured way for registration and processing. This process is enormously prone to mistakes as well. OCR technology comes to rescue in this situation. The optical character recognition or optical character reader (OCR) is the electronic or mechanical conversion of written text images, manuscript or printed in machine-coded text. This technology is suitable for photos of text documents and printed data records such as passports, invoices, bank statements, receipts, business cards and identity verification documents. The OCR technology is the way to digitize printed texts so that they can be edited electronically, searched, stored more compactly, displayed online and used in processes of machines such as cognitive computing, automatic translation, (extracted) text to voice, key data and extraction of sodaznava sodaznava sametsiS .acit¡Amrofni n³Áisiv al y laicifitra aicnegiletni al ,senortap ed otneimiconocer led opmac le ne n³Áiculove ne aÁgolocnet anu odneis eugis RCO IE OCR's smart technology is able to produce a high degree of recognition accuracy for most sources, and with support for a variety of digital image file format entries.
